

Siemon's new MAX TurboTool significantly reduces the time associated with the termination of category 5e and 6 UTP MAX outlets. In contrast to single conductor punchdown tools which require eight individual termination cycles for each outlet, the MAX TurboTool seats and cuts all 8 conductors with a single action.

**Durable Construction** – 13 gauge CRS ensures reliable operation through daily handling

**Definitive Ratcheting Action** – Provides positive audible and tactile feedback indicating that the termination process is complete

**Established Platform** – The tool shares the same proven core ratcheting platform as Siemon's PT-908 crimp tool which has been in the market for nearly 20 years

**High Contrast Colors** – Provide optimal visibility to prevent tool from inadvertently being left behind in low light areas

**Replaceable Termination Cartridges** – Allows the wearable part of the tool to be readily replaced

**Retention Clip** – Ensures outlets are fully seating prior to termination

Angled

Keystone

Flat

The tool supports termination of all category 5e and 6 MAX outlets – flat, angled and keystone

The rear cable channel provides cable access for the full range of category 5e and 6 UTP cable sizes while the side slots provide clearance for laced twisted-pair conductors

## Ordering Information

**MAX-TT** – MAX® TurboTool™

**MAX-TTREP** – Replacement MAX TurboTool Cartridge Kit - Includes outlet nesting die, termination die, attachment hardware and Allen wrench
