

Uncoated Steel Stainless Cable Tie

Ball Lock Type

Material:

- 316 Stainless steel for the most corrosive environments.
- High tensile strength.
- Low insertion force with excellent resistance to weathering and ageing.

Features:

Water Absorption: none.
Flammability: Non-flammable.
Ultraviolet resistance: excellent.
Chemical resistance: excellent.

Operating Temperature:

-80°C to +538°C.

Application:

- Self-locking head design speeds installation and locks into place at any length along the tie body.
- Provides a strong, durable method of cable bundling.
- Can be used in a wide range of indoor, outdoor and underground (including direct burial) applications.
- Smooth surfaces and rounded edges assures cable protection and worker safety.
- Provide the ultimate support for network cables.
